

# Memory capsule

*A space to embrace the memory*

A tribute that lasts forever

## What it is

The memory capsule is a private digital space that replaces the traditional condolence book and brings together text, voice, photo, or video messages sent by family and friends from anywhere in the world.

## How it works

- The capsule is activated and generates a private link.
- Anyone with the link can leave text, voice, photo, or video messages—no sign-ups or downloads required.
- Once sealed, the capsule gathers all contributions into a tribute video to keep forever.

## Trust and privacy

- Total privacy: all memories remain with the family; files are deleted from our servers after 30 days.
- Immediate access: no sign-ups or apps needed, accessible from any device.
- Family moderation: each message can be approved or hidden before the capsule is sealed.
